

RISHABH SOMVANSHI

Senior Frontend Engineer (React)

+91 9790729645 | Noida, U.P. | rishabhsomvanshi@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Senior Frontend Engineer with 6.5+ years of experience building and scaling React applications across healthcare, retail, fintech, and enterprise domains for Fortune 500 clients (UnitedHealth Group, Albertsons, Fiserv, Estée Lauder). Proven record of owning features end-to-end — from architecture and reusable component design to secure API integration, performance optimization, and production support. Comfortable leading modules, reviewing code, and collaborating directly with onshore client stakeholders in Agile teams.

SKILLS

Frontend: React.js, Redux, Redux-Saga, JavaScript (ES6+), TypeScript (working knowledge), HTML5, CSS3, Responsive Design

UI Libraries: Material UI, Ant Design, Tailwind CSS, Bootstrap 5, Bulma, jQuery

Integration & Security: RESTful APIs, MSAL/Azure AD authentication, EMV 3DS, OTP-based flows, secure file handling

Tools & Practices: Git, Bitbucket, JIRA, VS Code, Agile/Scrum, code reviews, CI-driven workflows

EXPERIENCE

Senior Developer | Accenture — Client: UnitedHealth Group (Optum, Curo platform) *May 2024 – Present*

- Develop and maintain React-based modules for Curo, Optum's care management platform used by clinical and care-coordination teams across UnitedHealth Group.
- Own features end-to-end — requirement analysis with onshore stakeholders, component design, REST API integration, testing, and production releases.
- Built reusable, accessible UI components and standardized Redux state-management patterns, reducing duplicated code and speeding up delivery of new screens.
- Improved page performance and reliability through code-splitting, memoization, and render optimization in data-heavy clinical workflows.
- Conduct code reviews and mentor junior developers; ensure adherence to coding standards and compliance expectations of a regulated healthcare environment.

Application Developer | TCS — Client: Albertsons *Jul 2023 – May 2024*

- Developed the BulkGiftCard web application in React with real-time order tracking, secure file upload/handling, and MSAL (Azure AD) single sign-on integration.
- Built a Gift Card Case Management system with detailed case views, attachments, and activity logs, streamlining support workflows for operations teams.
- Designed a gift card devaluation module covering expiry tracking, fee calculation, and partial redemption — improving maintainability and reducing manual processing.
- Recognized with 3 client/organization awards within 6 months (Applause Award, Best Performer of the Month, On-The-Spot Award).

Technology Analyst | Infosys — Client: Fiserv *Nov 2021 – Jun 2023*

- Led development of prepaid gift card management modules for major banking clients, implementing EMV 3DS and OTP-based security flows in React.
- Enhanced the CloseTheLoop application, extending prepaid and credit card functionality and improving the cardholder self-service experience.
- Coordinated with cross-functional teams (backend, QA, client SMEs) to deliver releases on schedule in an Agile environment.

Senior Systems Engineer | Infosys — Client: Estée Lauder *Dec 2019 – Nov 2021*

- Enhanced the PLM system UI for product lifecycle workflows and managed product master data (material master, FG, WIP, BOM) supporting global product launches.
- Delivered UI improvements that simplified data entry and reduced errors for business users.

EDUCATION

B.Tech, Electronics and Communication | SRM University — 84.44% *2015 – 2019*

CERTIFICATIONS & ACHIEVEMENTS

- 5★ in Problem Solving on HackerRank
- Easy to Advanced Data Structures (Udemy); Python Data Structures & Programming for Everybody (Coursera)
- Multiple client recognitions: Applause Award, Best Performer of the Month, On-The-Spot Award, Insta Award
